Dear [Applicant Name],

Subject: Rejection of Project Proposal

This letter serves as a formal **rejection of your project proposal** due to the insufficient supporting data provided. The evaluation panel thoroughly reviewed your submission and found that the proposal lacked the comprehensive evidence and relevant data sets necessary to validate the project's feasibility and potential impact.

As part of our evaluation process, detailed analysis is required to ensure the reliability and viability of proposed projects. Unfortunately, the information presented did not sufficiently demonstrate a strong foundation in terms of documented research, data analysis, or measurable projections. The absence of robust and well-documented data made it difficult for the panel to assess the potential success and impact of your proposal with confidence.

We genuinely appreciate the effort and thought that went into your submission. We encourage you to collect more thorough and relevant supporting data and to address the areas identified as insufficient. With a stronger foundation of evidence, we would be pleased to reconsider your project in a future submission cycle.

Should you require specific feedback or further clarification, please feel free to contact our office. Thank you again for your interest, and we look forward to your future proposals.

Sincerely,

[Your Name]
