Dear [Author Name(s)],

Thank you for submitting your manuscript titled "[Paper Title]" (Paper ID: [ID]) to [Conference Name].

After careful consideration and thorough evaluation by our program committee and external reviewers, we regret to inform you that your paper has not been accepted for presentation at this year's conference. While we recognize the effort and scholarship demonstrated in your submission, the committee felt that the paper, in its current form, does not fully meet the criteria for acceptance.

To assist you in improving your work and for your future submissions, we have included the detailed comments provided by our reviewers below:

---

### Reviewer 1 Comments:

- **Originality:** The topic is relevant, but the approach taken lacks novelty. Consider highlighting what differentiates your work from existing literature.
- **Methodology:** Methodological explanation was limited. Please expand on the experimental setup and include more details regarding the data collection process.
- **Clarity:** Some sections, particularly the results, are not clearly presented. Improving the structure and adding clarification will help the reader understand your findings.

### Reviewer 2 Comments:

- **Relevance:** The work addresses an important problem but the connection to the conference themes could be made stronger.
- **Contribution:** The contribution should be made more explicit in the introduction and conclusion. Please specify how your research advances the current state of the field.
- **References:** The reference list is missing several recent works on the topic. Including these will strengthen your manuscript.

### Reviewer 3 Comments:

- **Writing Quality:** There are numerous grammatical errors and typographical mistakes. Proofreading and editing the manuscript would improve its quality.
  - **Figures and Tables:** Figures are difficult to interpret. Ensure that all visual elements are legible and adequately explained in the text.
